

telecommunications

Our exclusive fiber to the building technology provides your business with a reliable, always-on high speed internet connection that has the power and capacity to grow with your company over the years and decades to come.

Welcome to the Future

HGE.net has constructed a next-generation fiber-optic network, delivering services you wouldn't expect to find outside of a major metropolitan area. High-speed internet service from HGE.net provides your business with fast access to internet research services, reliable connections to your suppliers, and a continuous link to your customers via e-mail... all without the hassles of dial-up connections... and all at an affordable price.

These next-generation services are delivered by Holyoke Gas & Electric, a company that local businesses have trusted to keep their buildings warm and offices bright since 1902. Experience the difference that local ownership and superior customer service can make for your business.

Affordable Rates HGE.net has a flexible plan for every business, offering standard single-site fiber optic internet access from \$110/month! And with a variety of custom service options, we can easily develop a solution to meet your organization's particular needs.

Burstable Internet Only pay for what you use... HGE.net's innovative usage-based billing option means that your business may actually pay less for faster internet service. We also offer traditional fixed-level internet services at very competitive rates.

Voice Transport Service Eliminate your telephone system's OPX and tie-lines to branch offices. HGE.net allows you to combine voice and data on a single line, utilizing your existing telephone switch. Many companies pay more for their current OPX lines than they would for a voice/data solution from HGE.net.

24-Hour Network Monitoring Our network never sleeps. We continuously monitor our fiber backbone to ensure network availability. And we can even pro-actively monitor the line into your building, offering same-day response and diagnosis.

Website Hosting Services HGE.net is a great place to call home. We have a fully-burstable T-3 internet connection to the world's premier backbone provider, UUNET. Web hosting services start at just \$22.50/month.

Co-location Services We can also provide a secure, climate controlled home for your company's important application and storage servers. Our facilities have back-up generation with optional UPS (uninterruptible power supply) services.
