serving you since 1902

Protect yourself from power surges.

What happens in an instant but can be felt for many years to come? It's a dangerous electrical surge — most often from a lightning strike, and it has the potential to destroy your family's valuable electronic equipment. Imagine your computer,

TV, VCR, microwave, washer, dryer and refrigerator all being suddenly destroyed. The cost in repair or replacement, plus programming or data can be staggering.

Introducing the Meter-Treater.

Fortunately, the Holyoke Gas and Electric Department offers a simple solution to this potential problem—the Meter-Treater Service. Mounted to your electric meter, the Meter-Treater stops electrical surges from ever even entering your home and causing any damage.

fact:

Most power strips are little more than glorified extension cords. For real protection you need a better solution... you need a MeterTreater.

How does the service work?

Holyoke Gas & Electric will install the Meter-Treater to your home or business at no charge. And the low \$3.75 monthly charge will be added to your bill. The service is automatically renewed annually. And you then have the option of discontinuing the service after one year with no charge. Isn't \$3.75 is such a small price to pay for so much piece of mind?

We can even protect your satellite dish and telephone... just call 536-9358 for details.
